

ABSTRACT OF THE DISCLOSURE

In one embodiment, a method includes but is not limited to authorizing at least one payment transaction wherein authorization is effected by user input to a computational entity through a wireless device. In addition to the foregoing, other method embodiments are described in the claims, drawing, and text forming a part of the present application. In one or more various embodiments, related systems include but are not limited to circuitry for effecting the foregoing-described method embodiments; the circuitry can be virtually any combination of hardware, software, and/or firmware configured to effect the foregoing-described method embodiments depending upon the design choices of the system designer.
